

Hiab Moffett Truck-Mounted forklifts

Poultry Collection & Transport

The Concept

Ready in Less than One Minute

Truck-mounted forklifts are a familiar sight on the back of poultry trucks. Light enough to be carried on almost any truck or trailer type they are dismantled / mounted in less than one minute, ready to handle chicks, pullets, hens, broilers, ducks, turkeys and geese.

The Poultry Specialist

The highly manoeuvrable Hiab Moffett poultry models are designed for long working hours, the deepest litter and difficult access areas, allowing quicker turnaround between poultry farm and processing factory.

Faster Turnaround Times

The Truck-mounted forklift does not require any load space and grants full independence from local loading/ offloading equipment. Its low profile design enables access to all areas in the poultry facility.

Less Damage & Stress

Hiab Moffett facilitates the handling of all aspects of the Poultry rearing process, from baby chicks to reared birds. The poultry modules are carried safely within the cargo bay of the machine, additional Red LED working lights minimising undue stress to the poultry.

Why Hiab Moffett?

Hiab Moffett Truck-mounted forklifts are successfully used in the poultry industry worldwide.

Unrivalled quality, outstanding performance and more than 40 years of experience and ongoing product development make Hiab Moffett the preferred choice for the handling and transport of poultry.

You can trust our reputation and references, reflected in a long list of convinced Hiab Moffett users – the big names in poultry growers and processing plants as well as small/ medium organisations.

Hiab Moffett Truck-mounted forklifts – Load Handling Solutions for the Poultry Industry

Efficient transport / delivery of new bedding, smooth handling of new chicks, operating in the toughest of conditions - the Hiab Moffett Truck-mounted forklift has redefined the standards of productivity in the industry.
